It describes the content analytics miner, and guides you on performing content analytics using views, dictionary lookup, and customization. The book also covers using IBM Content Analytics Studio for domain-specific content analytics, integrating with IBM Content Classification to get categories and new metadata, and interfacing with IBM Cognos® Business Intelligence (BI) to add values in BI reporting and analysis, and customizing the

content analytics miner with APIs. In addition, the book describes how to use the enterprise search capability for the discovery and retrieval of documents using various query and visual navigation techniques, and customization of crawling, parsing, indexing, and runtime search to improve search results. The target audience of this book is decision makers, business users, and IT architects and specialists who want to understand and analyze their enterprise content to improve and enhance their business operations. It is also intended as a technical how-to guide for use with

the online IBM Knowledge Center for configuring and performing content analytics and enterprise search with Content Analytics.

### **A Still Forest Pool**

Oct 15 2021

Achaan Chah spent many years walking and meditating in the forest monastery of Wat Ba Pong, engaging in the uncomplicated and disciplined Buddhist practice called dhudanga. A Still Forest Pool reflects the quiet, intensive, and joyous practice of the forest monks of Thailand. Achaan Chah's humble words, compiled by two Westerners who are former ordained monks, awaken the spirit of inquiry, *Online Library*

wonderment, understanding, and deep inner peace. Attachment, according to Achaan Chah, causes all suffering. Understanding the impermanent, insecure, and selfless nature of life is the message he offers for human happiness and realization. To vividly grasp the meaning of attachment leads us to a new place of practice - the path of balance, the Middle Path.

## **Python Crash Course, 2nd Edition**

Sep 26 2022 The second edition of the best-selling Python book in the world (over 1 million copies sold!). A fast-paced, no-nonsense guide to programming in Python. Updated

and thoroughly revised to reflect the latest in Python code and practices. Python Crash Course is the world's best-selling guide to the Python programming language. This fast-paced, thorough introduction to programming with Python will have you writing programs, solving problems, and making things that work in no time. In the first half of the book, you'll learn basic programming concepts, such as variables, lists, classes, and loops, and practice writing clean code with exercises for each topic. You'll also learn how to make your programs interactive and test your code safely

before adding it to a project. In the second half, you'll put your new knowledge into practice with three substantial projects: a Space Invaders-inspired arcade game, a set of data visualizations with Python's handy libraries, and a simple web app you can deploy online.

As you work through the book, you'll learn how to:

- Use powerful Python libraries and tools, including Pygame, Matplotlib, Plotly, and Django
- Make 2D games that respond to keypresses and mouse clicks, and that increase in difficulty
- Use data to generate interactive visualizations

In geographical scope it ranges from East Asia to the Americas. The

instruments described are set in their technical and social contexts, and there is also discussion of the literature, the historiography and the collecting of the subject. The book features the use of case studies to represent larger topics that cannot be completely covered in a single book. The international body of authors have endeavoured to offer a fully world-accessible to students, historians, collectors, and the general reader, based on a firm understanding of the technical basis of the subject. At the same time as the work offers a synthesis of current

knowledge of the subject, it also incorporates the results of some fundamental, new and original research. **Smart Grid Regional Demonstration Program** Dec 17 2021 Chromothripsis Aug 13 2021 This detailed book presents an up-to-date view on methods and experimental approaches developed to identify and explore the chromothripsis phenomenon. of chromothripsis, the bioinformatics tools for chromothripsis analysis, and experimental systems recently developed for the in vitro investigation of chromothripsis. Written for the highly successful Methods in Molecular Biology series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, Chromothripsis: Methods and Protocols serves as a vital resource for

cell biologists, molecular biologists, cytogeneticists, and geneticists investigating chromothripsis, but also for students and researchers new to the field of chromothripsis and genomic instability. *Incerto 4-Book Bundle* Oct 03 2020 Nassim Nicholas Taleb's landmark Incerto series is an investigation of luck, uncertainty, probability, opacity, human error, risk, disorder, and decision-making in a world we don't understand, in nonoverlapping and standalone books. All four volumes—Antifragile, The Black Swan, Fooled by Randomness, and the expanded edition of The Bed

of Procrustes, updated with more than 50 percent new material—are now together in one ebook bundle. ANTIFRAGILE “Startling . . . richly crammed with insights, stories, fine phrases and intriguing asides.”—The Wall Street Journal Just as human bones get stronger when subjected to stress and tension, many things in life benefit from disorder, volatility, and turmoil. What Taleb has identified and calls “antifragile” is that category of things that not only gain from chaos but need it in order to survive and flourish. The resilient resists shocks and stays the same; the antifragile gets stronger.

better and better. What is crucial is that the antifragile loves errors, as it incurs small harm and large benefits from them. Spanning politics, urban planning, war, personal finance, economic systems, and medicine in an interdisciplinary and erudite style, *Antifragile* is a blueprint for living in a Black Swan world. THE BLACK SWAN “[A book] that altered modern thinking.”—The Times (London) A black swan is a highly improbable event with three principal characteristics: It is unpredictable; it carries a massive impact; and, after the fact, we concoct an explanation that makes it appear

less random and more predictable. The astonishing success of Google was a black swan; so was 9/11. In this groundbreaking and prophetic book, Taleb shows that black swan events underlie almost everything about our world, from the rise of religions to events in our own personal lives, and yet we—especially the experts—are blind to them. FOOLED BY RANDOMNESS “[Fooled by Randomness] is to conventional Wall Street wisdom approximately what Martin Luther’s ninety-five theses were to the Catholic Church.”—Malcolm Gladwell, *The New Yorker* Are we capable of

distinguishing the fortunate charlatan from the genuine visionary? Must we always try to uncover nonexistent messages in random events? Fooled by Randomness is about luck: more precisely, about how we perceive luck in our personal and professional experiences. Set against the backdrop of the most conspicuous forum in which luck is mistaken for skill—the markets—*Fooled by Randomness* is an irreverent, eye-opening, and endlessly entertaining exploration of one of the least understood forces in our lives. PROCRUSTES  
“Taleb’s crystalline nuggets of thought stand alone like esoteric poems.”—Financial Times This collection of aphorisms and meditations expresses Taleb’s major ideas in ways you least expect. The Bed of Procrustes takes its title from Greek mythology: the story of a man who made his visitors fit his bed to perfection by either stretching them or cutting their limbs. With a rare combination of pointed wit and potent wisdom, Taleb plows through human illusions, contrasting the classical views of courage, elegance, and erudition

against the modern diseases of nerdiness, philistinism, and phoniness.

*Luminous Emptiness* Apr 09 2021 The Tibetan Book of the Dead, a best-seller for three decades, is one of the most widely read texts of Tibetan Buddhism. Over the years, it has been studied and cherished by Buddhists and non-Buddhists alike. *Luminous Emptiness* is a detailed guide to this classic work, elucidating its mysterious concepts, terms, and imagery. Fremantle relates the symbolic world of the Tibetan Book of the Dead to the experiences of

everyday life, presenting the text not as a scripture for the dying, but as a guide for the living. According to the Buddhist view, nothing is permanent or fixed. The entire world of our experience is constantly appearing and disappearing at every moment. Using vivid and dramatic imagery, the Tibetan Book of the Dead presents the notion that most of us are living in a dream that will continue from lifetime to lifetime until we truly awaken by becoming enlightened. Here, Fremantle, who worked closely with Chögyam Trungpa on the 1975 translation of the Tibetan ~~Book of the~~

movie, and if it has an animal in it chances are Mark Vette was behind it. He's trained almost every species you can think of. But the famous animal behaviourist and trainer who captured global attention with 'Dogs Who Drive Cars' and 'Dogs Who Fly Planes' is not just an animal maestro. He's a long-time Buddhist, who brings to his relationships with animals a true emotional bond, enormous respect, and the sure knowledge that we humans are just one piece of this great, interconnected puzzle we call Life on Earth. This is his story, and the stories of the animals he has

worked with over the decades. From a classic Kiwi childhood of outdoor activities and sport, with plenty of time on the farm, through a growing conviction that killing animals wasn't for him, to his embracing of Buddhism and his developing work with animals of all kinds, Mark's life and beliefs unfold in a thoroughly relatable way - with jaw-dropping and laugh-out-loud moments thrown in. [Mastering the Core Teachings of the Buddha](#) Jan 06 2021 The very idea that the teachings can be mastered will arouse controversy within Buddhist circles. Even so, Ingram insists that enlightenment is an attainable goal, once our fanciful notions of it are stripped away, and we have learned to use meditation as a method for examining reality rather than an opportunity to wallow in self-

absorbed mind-noise. Ingram sets out concisely the difference between concentration-based and insight (vipassana) meditation; he provides example practices; and most importantly he presents detailed maps of the states of mind we are likely to encounter, and the stages we must negotiate as we move through clearly-defined cycles of insight. Its easy to feel overawed, at first, by Ingram's assurance and ease in the higher levels of consciousness, but consistently he writes as a down-to-earth and compassionate guide, and to the practitioner willing to commit themselves this is a

glittering gift of a book. In this new edition of the bestselling book, the author rearranges, revises and expands upon the original material, as well as adding new sections that bring further clarity to his ideas.

**IBM Classification Module: Make It Work for You** May 10 2021 IBM® Classification Module (Classification Module) Version 8.6 is an advanced enterprise software platform tool designed to allow organizations to automate the classification of unstructured content. By deploying the module in various areas of a business,

organizations can reduce or avoid manual processes associated with subjective decision making around unstructured content.

Organizations can also streamline the ingestion of that content into their business systems in order to use the information within the business systems more effectively. At the same time, the organizations can safely remove irrelevant or obsolete information and therefore utilize the storage infrastructure more efficiently. By reducing the human element in this process, Classification Module ensures accuracy and

consistency and enables auditing while simultaneously driving down labor costs. This IBM Redbooks® publication explains what Classification Module does, the key concepts to understand when working with Classification Module, and its integration with other products and systems. With this book, we show you how Classification Module helps your organization to automate the classification of large volumes of unstructured content in a consistent and accurate manner. The topics that are covered include building, training, and fine-tuning the knowledge base,

creating decision plans, working with Classification Workbench, and step-by-step integration with other products and solutions. This book is intended to educate both technical specialists and nontechnical personnel in how to make Classification Module work for your organizations.

Middle Way), and it can be argued that it is impossible to discuss Nagarjuna's work in an informed way without consulting it. It discusses alternative readings of the text and prior commentaries and provides a detailed exegesis, constituting a systematic presentation of Madhyamaka Buddhist philosophy. Despite its central importance, however, of Tsong kha pa's three most important texts, only An Ocean of Reasoning remains untranslated, perhaps because it is both philosophically and linguistically challenging, demanding a rare combination of

abilities on the part of a translator. Jay Garfield and Ngawang Samten bring the requisite skills to this difficult task, combining between them expertise in Western and Indian philosophy, and fluency in Tibetan, Sanskrit, and English. The resulting translation of this important text will not only be a landmark contribution to the scholarship of Indian and Tibetan Buddhism, but will serve as a valuable companion volume to Jay Garfield's highly successful translation of The Fundamental Wisdom of the Middle Way.
