The Big Shift Nov 01 2022 For almost its entire history, Canada has been run by the political, media and business elites of Toronto, Ottawa and Montreal. But in the past few years, these groups have lost their power—and most of them still do not realize it's gone. The Laurentian Consensus, the term John Ibbitson has coined for the dusty liberal elite, has been replaced by a new, powerful coalition based in the West and supported by immigrant voters in Ontario. How did this happen? Most people are unaware that the keystone economic and political drivers of this country are now Western Canada and immigrants from China, India and other Asian countries. Politicians and businesspeople have underestimated how conservative these newcomers are making our country. Canada, with its ever-evolving economy and fluid demographic base, has become divorced from the traditions of its past and is moving in an entirely new direction. In The Big Shift, Darrell Bricker and John Ibbitson argue that one of the world's most consensual countries is becoming polarized, exhibiting stark differences between East and West, cities and suburbs, Canadianborn citizens and immigrants. The winners—in both politics and business— will be those who can capitalize on the tremendous changes that the Big Shift will bring.

How Societies Work Dec 30 2019 Offering a unique introduction to the analysis of contemporary Canadian society, this in-depth study focuses on both the roots of modern civilizations and the current political economy of Canada. Drawing on various sociological theories as well as anthropology, genetics, economics, history, philosophy, politics, and social psychology, this accessible and integrated book helps undergraduate students make sense of a complex social world. Allowing students to open their minds to the “sociological imagination” by connecting the world to their own lived experiences, this revised edition includes several new topics, reorganized chapters, and student-friendly language.

[Changing Canada](#) Mar 01 2020 Changing Canada examines political transformations, welfare state restructuring, international boundaries and contexts, the new urban experience and creative resistance. The authors question dominant ways of thinking and promote alternative ways of understanding and explaining Canadian society and politics that encourage progressive social change. They examine how the evolution of capitalism is producing new types of transformations and new forms of resistance, and show that aspects of the state and the wider society are being contested. They also discuss the often paradoxical or contradictory effects of various social forces, such as the liberating but also constraining features of new communications technologies, new employment norms and new household forms.

[Relentless Change](#) Dec 22 2021 Casebooks in business history are designed to instruct students in classrooms and boardrooms about the evolution of business management. The first casebook for the study of business history in a Canadian context, Joseph E. Martin's text will help students, both in the classroom and the boardroom, understand the Canadian economy and guide them in making sound decisions and contributing to a healthy, growing economy. Thirteen original case studies from the mid-nineteenth to the twenty-first centuries deal with different industry sectors as well as individual corporations and managers. Overviews provide context by examining major public policy decisions and key developments in the financial system that have affected business practices. Martin also presents eight original tables that trace the evolution of the 60 largest Canadian corporations between 1905 and 2005. Relentless Change is an invaluable resource for instructors and business students and clearly demonstrates how businesses are affected by the interaction of individual decisions, policy changes, and market trends.

Cli-fi Dec 10 2020 With the world facing the greatest global crisis of all time - climate change - personal and political indifference has wrought a series of unfolding complications that are altering our planet, and threatening our very existence. Reacting to the warnings sounded by scientists and thinkers, writers are responding imaginatively to the seriousness of changing ocean conditions, the widening disappearance of species, genetically modified organisms, increasing food shortages, mass migrations of refugees, and the hubris behind our provoking Mother Earth herself. These stories of Climate Fiction (Cli-fi) feature perspectives by culturally diverse Canadian writers of short fiction, science fiction, fantasy, and futurist works, and transcend traditional doomsday stories by inspiring us to overcome the bleak forecasted results of our current indifference. Authors: George McWhirter, Richard Van Camp, Holly Schofield, Linda Rogers, Sean Virgo, Rati Mehrotra, Geoffrey W. Cole, Phil Dwyer, Kate Story, Leslie Goodreid, Nina Munteanu, Halli Villegas, John Oughton, Frank Westcott, Wendy Bone, Peter Timmerman, Lynn Hutchinson-Lee, with an afterword by internationally acclaimed writer and filmmaker, Dan Bloom.

[Canada and Climate Change](#) Mar 25 2022 Pandemics, massive earthquakes, war, and other catastrophes inspire immediate action because their casualties and destruction are immediately visible. Climate change is an unyielding problem because its long-range dangers are hidden, and thus it is a global risk unlike anything in human experience. The federal government recently announced aggressive climate targets for Canada. We have committed to producing net-zero greenhouse gas emissions by 2050, which will require major changes for our economy and way of life. Canadian citizens need to understand why our most distinguished climate scientists and our senior political leaders think that we must meet this target. Canada and Climate Change explains the importance of policies that will ensure we meet the net-zero emissions target. William Leiss provides a firm grasp on what climate change is and how scientists have described shifts in the earth's climate as they have occurred over hundreds of millions of years and as they are likely to occur in the near future, especially by the end of this century. Leiss argues that citizens have a right to place their trust in what climate scientists tell us. Canada and Climate Change is an essential primer on where we stand on the issue of climate change in Canada and what will unfold in the years ahead.

[Partisanship and Party Ideology: Comparing Canada and the United States of America](#) Feb 21 2022 Essay from the year 2007 in the subject Politics - International Politics - Region: USA, grade: 1,7, Free University of Berlin, 12 entries in the bibliography, language: English, abstract: Canada and the United States of America have equally developed a form of structural federalism, both use a single-member plurality election system and have similar social and economic class structures. In contrast to the two-party tradition of the US in a presidential system, Canada has developed a multiparty parliamentary system in which the legislative parties are cohesive and disciplined due to the historical influence of British Westminster System. In general party identification has been defined as “an attachment to a party that helps the citizen locate him/herself and others on the political landscape.” The aim of this paper is to explore the possibility of shifts in ideological party identification with respect to the significantly different party systems in Canada and the United States, with special focus on the time span between 1984 and 2000. The central question discussed in this paper is whether or not there has been a significant change in partisan ideology in Canada compared to the United States between 1984 and 2000, and whether Canadian Partisans are more volatile compared to their southern counterparts in terms of ideological party identification.

[Trumping Trudeau](#) Sep 06 2020 The Justin Trudeau era came crashing to an end on November 8, 2016 when Donald Trump was elected President of the United States. On everything from carbon taxes to Cuba, Canadian policy is suddenly obsolete. Will Trudeau and his advisors realign themselves with our largest trading partner and ally? Or will Trudeau do what his father did - play the role of anti-American gadfly, to the delight of the Third World but the detriment of Canadians? Ezra Levant, the best-selling author of Ethical Oil and other trouble-making books, is here to say what no-one in the liberal media will: Trudeau vs. Trump is shaping up to be Bambi vs. Godzilla.

Continuity and Change in Canadian Politics Apr 25 2022 Change and Continuity in Canadian Politics gets to the heart of key issues and provides important insights into contemporary Canadian government and politics.

[Policy Change, Courts, and the Canadian Constitution](#) Jun 15 2021 Policy Change, Courts, and the Canadian Constitution aims to further our understanding of judicial policy impact and the role of the courts in shaping policy change. Bringing together a group of political scientists and legal scholars, this volume delves into a diverse set of policy areas, including health care issues, the regulation of elections, criminal justice policy, minority language education, citizenship, refugee policy, human rights legislation, and Indigenous policy. While much of the public

law and judicial politics literatures focus on the impact of the constitution and the judicial role, scholarship on courts that makes policy change its central lens of analysis is surprisingly rare. Multidisciplinary in its approach to examining policy issues, this book focuses on specific cases or policy issues through a wide-ranging set of approaches, including the use of interview data, policy analysis, historical and interpretive analysis, and jurisprudential analysis.

Changing Women, Changing History Jul 17 2021 Changing Women, Changing History is a bibliographic guide to the scholarship, both English and French, on Canadian's women's history. Organized under broad subject headings, and accompanied by author and subject indices it is accessible and comprehensive.

Changing Politics of Canadian Social Policy Jun 03 2020 The authors track the history of the welfare state from its establishment in the 1940s, through its development in the mid 1970s, to the complications of globalization and an increasingly diverse population in the 1990s.

Taking the Air Aug 06 2020 In Taking the Air, Paul Kopas takes a comprehensive approach to the policy aspects of the management of parks and protected areas. He scrutinizes the policy-making process for national parks since the mid-1950s and interrogates the rationale and policies that have governed their administration. He argues that national parks and park policy reflect not only environmental concerns but also the political and social attitudes of bureaucrats, citizens, interest groups, Aboriginal peoples, and legal authorities. He explores how the goals of each group have been shaped by the historical context of park policy, influencing the shape and weight of their contributions.

Extracting Home in the Oil Sands Aug 25 2019 The Canadian oil sands are one of the world's most important energy sources and the subject of global attention in relation to climate change and pollution. This volume engages ethnographically with key issues concerning the oil sands by working from anthropological literature and beyond to explore how people struggle to make and hold on to diverse senses of home in the region. The contributors draw on diverse fieldwork experiences with communities in Alberta that are affected by the oil sands industry. Through a series of case studies, they illuminate the complexities inherent in the entanglements of race, class, Indigeneity, gender, and ontological concerns in a regional context characterized by extreme extraction. The chapters are unified in a common concern for ethnographically theorizing settler colonialism, sentient landscapes, and multispecies relations within a critical political ecology framework and by the prominent role that extractive industries play in shaping new relations between Indigenous Peoples, the state, newcomers, corporations, plants, animals, and the land.

Environmental Change and Challenge Jan 23 2022 Current, comprehensive, and Canadian - the engaging introduction to environmental studies for every student This is a comprehensive and up-to-date introduction to the increasing pressures and rapid transformations that threaten our fragile planet. Examining the impacts of and possible solutions to environmental change, this text gives readers the tools they need to think critically, take action, and make environmentally sound choices.

Changing Neighbourhoods Oct 27 2019 Canadians have a right to live in cities that meet their basic needs in a dignified way, but in recent decades increased inequality and polarization have been reshaping the social landscape of Canada's urban areas. This book examines the dimensions and impacts of increased economic inequality and urban socio-spatial polarization since the 1980s. Based on the work of the Neighbourhood Change Research Partnership, an innovative national comparative study of seven major cities, the authors reveal the dynamics of neighbourhood change across the Canadian urban system. While the heart of the book lies in the project's findings from each city, other chapters provide important context. Taken together, they offer important understandings of the depth and the breadth of the problem at hand and signal the urgency for concerted policy responses in the decades to come.

Internationalization and Canadian Agriculture Sep 26 2019 In recent decades, Canada's agricultural industry, one of the world's largest, has had to adjust to global trade developments such as the North American Free Trade Agreement (NAFTA) and the World Trade Organization. Internationalization and Canadian Agriculture examines the patterns of continuity and change in Canadian agricultural policy making in important areas like farm income support programs, prairie grain marketing, supply management, animal and food product safety, and the regulation of genetically modified crops and foods. Arguing that the effects of internationalization have been mediated by Canada's political institutional framework, Grace Skogstad demonstrates how the goals and strategies of authoritative political actors in Canada's federal and parliamentary systems have been decisive to policy developments. Skogstad details the interaction between agriculture and the political economy of Canada, shows how international and domestic trade shape Canadian agricultural policies, and argues that while agricultural programs have changed, the post-war state assistance agricultural paradigm has persisted. A thorough political analysis and history of late twentieth- and early twenty-first-century Canadian agricultural policy and policy-making, Internationalization of Canadian Agriculture is an important contribution to political economy and public policy.

Justin Trudeau and Canadian Foreign Policy Oct 08 2020 This book offers the first comprehensive analysis of Canadian foreign policy under the government of Justin Trudeau, with a concentration on the areas of climate change, trade, Indigenous rights, arms sales, refugees, military affairs, and relationships with the United States and China. At the book's core is Trudeau's biggest and most unexpected challenge: the election of Donald Trump as president of the United States. Drawing on recognized experts from across Canada, this latest edition of the respected Canada Among Nations series will be essential reading for students of international relations and Canadian foreign policy and for a wider readership interested in Canada's age of Trudeau. Canada and Radical Social Change Apr 13 2021 A collection of articles originally published in the radical quarterly Our generation.

Urbanism and the Changing Canadian Society Nov 28 2019 In this collection of essays the changing structure of the Canadian community, especially in its urban growth, is brought before the reader with many fresh insights, much vigorous comment, and apt illustration. The authors, concentrating on certain kinds of problems which have interested them individually, provide for student and general reader stimulating analysis of social phenomena which are under lively examination these days in Canada and beyond both in popular and semi-popular journals and magazines and in learned writings. Nathan Keyfitz opens the volume with a valuable background analysis of the way in which the population of Canada has reached its present numbers and distribution and examines the effects of immigration and of changing rates of birth and death. S.D. Clark deals with the controversial question of what the real characteristics of the suburban community can be seen to be and comments forcefully on the "suburbia" of Riesman, Whyte, et al. W.E. Mann presents a fascinating analysis of the patterns of life in a slum area of Toronto which swarms with factory workers and truck-drivers, with people of many racial origins, and which has developed social habits based largely on rooming-houses, small shops, and pubs. Jean Burnet provides an historical account of changing moral standards of sobriety and piety as reflected in sabbatarian and temperance movements in Toronto, long regarded as the quintessence of severity. Oswald Hall gives a valuable analysis of the patterns of growth in the professions and of the kinds of competitive struggles going on within them and at the borders between them as new groups strive to win this status in society. P.J. Giffen takes up an important related question of how interests of a self-governing profession relate to the expectations of the public and uses the legal profession as his example. Finally, Leo Zakuta adds to the scanty literature on Canadian political parties an analysis of the changing character of the C.C.F., long the dominant force in left-of-centre politics. The authors all are, or have been members of the staff in sociology at the University of Toronto, and their essays convey an excellent picture of the liveliness of the work they jointly carry forward. This volume will thus serve not only to introduce students to some of the kinds of problems sociologists are thinking about but will also make better known to them as a group some of the sociologists in Canada who are engaged with them.

Changing Social Geography of Canadian Cities May 03 2020 The contributors to this volume demonstrate the richness and diversity of the social landscapes and communities in Canadian urban centres, emphasizing changes which occurred in the period from the mid 1960s to the early 1990s. The nineteen non-technical and integrative essays include reviews of the literature, empirical studies, and discussions of policy issues. Inuit Women Nov 08 2020 Inuit Women is the definitive study of the Inuit during a time of rapid change. Written shortly after the creation of Nunavut, a new province carved out of traditional Inuit homelands in the Canadian North, this compelling book combines conclusions drawn from the authors' fourteen years of ethnographic research with the stories of Inuit women and men, told in their own words. Inuit Women also explores global issues: the impact of rapid social change and Canadian resettlement policy on Inuit culture; women's roles in society; and gender relations in Baffin Island, in the Eastern Arctic. Billson and Mancini also include an extensive section on how the newly created territory of Nunavut is impacting the lives of Inuit women and their families. This book stands alone in its attention to Inuit women's issues and lives and should be read by everyone interested in gender relations, development, modernization, globalization, and Inuit culture.

Anticipating the Inevitable Changes Coming to Canada Feb 09 2021 "From his lifelong professional career as an ecological consultant Dr. Ludwig brings a unique perspective to some of the most pressing of Canada's challenges economic, geopolitical, demographic and hydrological as well as climatological. He suggests creation of an all-Canadian East-West Infrastructure Corridor to reverse Canada's drift into dangerous (for Canada) continentalism. This proposal will not be popular with those of our federal and provincial politicians who are committed to failed neoliberal ideology. Nevertheless, for the rest of us, his perceptive analyses should stimulate critical thinking and even, let us hope, collective action." Dr. Bruce Partridge Dr. Bruce Partridge speaks from his successive careers as Executive Vice-President of one of the leading US universities, President of a Canadian university, and Vice President & General Counsel of one of Canada's largest multinational mining corporations.

Bilateral Ecopolitics Jun 23 2019 The context in which environmental policy decision-making occurs has changed, resulting from widening environmental problems, increased demands from groups and citizens, continuing pressure on the continent's resources and normative shifts. The complexity of current issues is related to an even broader contextual shift: the globalization of environmental issues exacerbated by trade liberalization, especially on a regional level and the potential contradictions between trade and the environmental international agenda that this implies. This volume studies the new dimensions of resource conflict between Canada and the United States, accounting for the emergence of new bilateral environmental issues and detailing how trade liberalization has fostered both disputes and policy convergence. It also examines the recent shifts in America towards a unilateral foreign policy and how this affects active Canadian diplomacy Ideal as a resource tool for students and academics, this book will be a key resource in the areas of global governance, US-Canadian foreign policy and environmental policy.

Aiming to Explain Oct 20 2021 Firearms policy has periodically dominated Canadian politics since the late 1960s. Compared to the United States, however, there is little scholarship on firearms policy to the neighbouring north. Using Canadian firearms policy, Aiming to Explain examines five prominent policy process theories employed during the period from the 1989 Montreal Massacre to the 2012 cancellation of the universal firearms registry. Throughout, B. Timothy Heinmiller and Matthew A. Hennigar present rigorous applications of rational choice institutionalism, social constructivism, the advocacy coalition framework, the multiple streams framework, and punctuated equilibrium. The investigations draw on method-based best practices, while also making use of a wide range of data collection and analysis techniques, including inferential statistics, descriptive statistics, process tracing, congruence analysis, and qualitative content analysis. The goal of Aiming to Explain is not to select a single best theory, but to compare their relative strengths and weaknesses in an effort to direct future research

and theoretical development efforts in the study of Canadian public policy.

The Changing Canadian Population Sep 18 2021 Current social and economic changes in Canada raise many questions. Will Canada's education system be able to maintain its competitiveness when faced with increasing globalization? Will the growing numbers of immigrants and their children be successfully integrated? How will Canada's social institutions respond to a rapidly aging population? The Changing Canadian Population assembles answers from many of Canada's most distinguished scholars, who reassess the current state of society and Canada's preparedness for the challenges of the future. Analysing the authoritative information of recent census data, contributors present a comprehensive overview of crucial issues, including employment, family arrangements, internal migration, population distribution, urbanization, language, ethnicity, and religion. An invaluable reference for understanding the direction of Canadian society, The Changing Canadian Population synthesizes the monumental information contained in the census in accessible and clarifying chapters.

Utopian Universities Jan 29 2020 In a remarkable decade of public investment in higher education, some 200 new university campuses were established worldwide between 1961 and 1970. This volume offers a comparative and connective global history of these institutions, illustrating how their establishment, intellectual output and pedagogical experimentation sheds light on the social and cultural topography of the long 1960s. With an impressive geographic coverage - using case studies from Europe, the Americas, Africa and Asia - the book explores how these universities have influenced academic disciplines and pioneered new types of teaching, architectural design and student experience. From educational reform in West Germany to the establishment of new institutions with progressive, interdisciplinary curricula in the Commonwealth, the illuminating case studies of this volume demonstrate how these universities shared in a common cause: the embodiment of 'utopian' ideals of living, learning and governance. At a time when the role of higher education is fiercely debated, Utopian Universities is a timely and considered intervention that offers a wide-ranging, historical dimension to contemporary predicaments.
