Preserving Historic Architecture Nov 07 2020 The National Park Service, a branch of the Department of the Interior, knows preservation. In its hundred-year existence, the service has dealt with just about every problem an old structure can have. Whether it is removing graffiti in Manhattan or rebuilding a barn in Oregon, the National Park Service knows what to do. Here are the official U.S. guidelines, a lively and instructive collection of tried and tested knowledge and reliable techniques, written by the top experts in the field. Over forty fully illustrated chapters addressing topics such as: - cleaning and waterproof coating of historic masonry - roofing for historic buildings - the preservation of historic glazed architectural terra-cotta - exterior paint problems on historic woodwork - the preservation of historic barns - heating, ventilating, and cooling historic buildings - historic signs - applied decoration for historic interiors - using substitute materials on historic building exteriors - understanding old buildings - understanding architectural cast iron Every chapter is written with the utmost detail and clarity so that any reader can perform the safest and most historically accurate repairs. The book also offers invaluable advice on what not to do that can save a homeowner thousands of dollars, hours, and perhaps a priceless piece of architecture. For the hobbyist or the professional restorer, *The Preservation of Historic Architecture* is the definitive government text on restoring, repairing, and preserving old buildings.

[Seven Children of the King](#) Sep 25 2019 The night before twenty-one-year-old Carly Shanahan takes her little brother and three friends on a three-day caving expedition, Sanford, the elderly eccentric owner of the cave, begins to quote quatrains written by Nostradamus. The next day, shortly after entering the cave, an earthquake traps the group inside with the old man and his notebook. Twenty miles away, a cluster of prisoners on a work release program inside a coalmine plans an escape. Just as the prisoners, led by a vicious psychopath, brutally murder two guards, the same earthquake also traps them underground. Days later, when both groups finally escape from their subterranean confinement, the world is a very different place. Is it possible Sanford is actually a conduit, prophesizing from the past? Did he somehow know that world-changing events were about to unfold? Carly must use Sanford and Nostradamus quatrains as a guide to find a way to save her companions while also somehow preventing the extinction of mankind. She might not be prepared to play the role thrust upon her, but the fate of her friends and the world now depends on her ability to make the right decisions.

Norcrest Gardens Oct 07 2020 When journalist Evan Clarke's life fell apart around him, all that was left was seclusion in his cabin nestled in the Rocky Mountains.

After arriving at the all but forgotten forest retreat, bizarre and haunting events begin to transpire all around him, coupled with a postcard from an unknown sender that beckons him to a place he had never heard of, let alone ever been. Driven by confusion and frustration with the strange happenings, he embarks on a journey across the country to uncover the mysteries surrounding a centuries old secret that never in his life he could have thought to be possible.

Fill 'er Up! Jun 02 2020 In this car culture of ours, what could be more American than the gas station, from the roadside pit stop in the middle of nowhere to the spit-and-polish, full service city shop? This brightly illustrated history of service stations runs the gamut from East to West, North to South, spotlighting the culture and lore of the gas-pumping garage that has kept the United States moving for a century. Whether it's the last-chance Texaco or the Sinclair dinosaur winking in the distance, the beckoning Shell, or the winged Mobil horse, it's here in all its small-town glory of compact architecture, inspired promotions, art deco pumps, and endless views of the American horizon. Author Tim Russell, one of the world's foremost collectors and historians of Petrolia, rolls out the ribbon of highway that takes us to all of those way stations of Americas motoring past.

Popular Mechanics Dec 09 2020 Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

The End of Night Feb 08 2021 A deeply panoramic tour of the night, from its brightest spots to the darkest skies we have left. A starry night is one of nature's most magical wonders. Yet in our artificially lit world, three-quarters of Americans' eyes never switch to night vision and most of us no longer experience true darkness. In *The End of Night*, Paul Bogard restores our awareness of the spectacularly primal, wildly dark night sky and how it has influenced the human experience across everything from science to art. From Las Vegas' Luxor Beam -- the brightest single spot on this planet -- to nights so starlit the sky looks like snow, Bogard blends personal narrative, natural history, science, and history to shed light on the importance of darkness -- what we've lost, what we still have, and what we might regain -- and the simple ways we can reduce the brightness of our nights tonight.

Encyclopedia of Twentieth Century Architecture Aug 29 2022 For more information including the introduction, a full list of entries and contributors, a generous selection of sample pages and more, visit the Encyclopedic of 20th Century Architecture website. Focusing on architecture from all regions of the world, this three-volume set profiles the twentieth century's vast chronicle of architectural achievements, both within and well beyond the theoretical confines of modernism. Unlike existing works, this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types, movements, styles, and building practices across traditional geographic and cultural boundaries.

Along Route 66 Oct 19 2021 It was the way out. Invented on the cusp of the depression, Route 66 was the road out of the mines, off the farm, away from troubled Main Street. It was the road to opportunity. Between 1926 and 1956, many people from the southern and plains states trekked west to California on Route 66, the Mother Road. Some never reached California. Instead, they settled along the road, building restaurants, tourist attractions, gas stations, and motels. The architecture of each structure reflected regional building traditions and the difficulties of the times. The designs of buildings and signs served as invitations for passing travelers to

stop, fill their tanks, have a bite, and stay the night. Along Route 66 describes the architectural styles found along the highway from Chicago, Illinois, to Santa Monica, California, and pairs photos with stories of the buildings and of the people who built them, lived in them, and made a living from them. With striking black-and-white images and unforgettable oral histories of this rapidly disappearing architecture, Quinta Scott has documented the culture of America's most famous road.

The Gas Station in America Oct 31 2022 "The first architect-designed gas station - a Pittsburgh Gulf station in 1913 - was also the first to offer free road maps; the familiar Shell name and logo date from 1907, when a British mother-of-pearl importer expanded its line to include the newly discovered oil of the Dutch East Indies; the first enclosed gas stations were built only after the first enclosed cars made motoring a year-round activity - and operating a service station was no longer a "seasonal" job; the system of "octane" rating was introduced by Sun Oil as a marketing gimmick (74 for premium in 1931)." "As the number of "true" gas stations continues its steady decline - from 239,000 in 1969 to fewer than 100,000 today - the words and images of this book bear witness to an economic and cultural phenomenon that was perhaps more uniquely American than any other of this century."--Jacket.

U.S. Master Depreciation Guide 2008 May 26 2022 CCH's U.S. Master Depreciation Guide offers tax and accounting professionals who work with businesses a one-stop resource for guidance in understanding and applying the complex depreciation rules to their fixed assets. This area is especially challenging, because bits and pieces of applicable information must be gathered from a maze of Revenue Procedures, IRS Tables and IRS Regulations. These sources are frequently old and include some materials which may be non-applicable. CCH's U.S. Master Depreciation Guide pulls the pieces together, so practitioners can make sense of all the corresponding information and put the information into practice.

Fill 'er Up Sep 29 2022 Step back to the day when a visit to the gas station meant service with a smile, a wash of the windshield, and the cheerful question, "Fill 'er up?" Since their unremarkable beginnings as cheap shacks and curbside pumps at the dawn of the automobile age, gas stations have taken many forms and worn many guises: castles, cottages and teepees, Art Deco and Streamline Moderne, clad with wood, stucco, or gleaming porcelain in seemingly infinite variety. The companion volume to the Wisconsin Public Television documentary of the same name, Fill 'er Up: The Glory Days of Wisconsin Gas Stations visits 60 Wisconsin gas stations that are still standing today and chronicles the history of these humble yet ubiquitous buildings. The book tells the larger story of the gas station's place in automobile culture and its evolution in tandem with American history, as well as the stories of the individuals influenced by the gas stations in their lives. Fill 'er Up provides a glimpse into the glory days of gas stations, when full service and free oil changes were the rule and the local station was a gathering place for neighbors. More importantly, Fill 'er Up links the past and the present, showing why gas stations should be preserved and envisioning what place these historic structures can have in the 21st century and beyond.
