The Form of News May 14 2021 This book takes a fresh look at the role of the newspaper in United States civic culture. Unlike other histories which focus only on the content of newspapers, this book digs deeper into ways of writing, systems of organizing content, and genres of presentation, including typography and pictures. The authors examine how these elements have combined to give newspapers a distinctive look at every historical moment, from the colonial to the digital eras. They reveal how the changing "form of news" reflects such major social forces as the rise of mass politics, the industrial revolution, the growth of the market economy, the course of modernism, and the emergence of the Internet. Whether serving as town meeting, court of opinion, marketplace, social map, or catalog of diversions, news forms are also shown to embody cultural authority, allowing readers to see and relate to the world from a particular perspective. Including over 70 illustrations, the book explores such compelling themes as the role of news in a democratic society, the relationship between news and visual culture, and the ways newspapers have shaped the meaning of citizenship. Winner of the International Communication Association Outstanding Book Award

Newspaper Building Design and Journalism Cultures in Australia and the UK: 1855-2010 Feb 20 2022 This book examines the micro-cultural ideologies of the journalism profession in Britain and Australia by focusing on the design, execution and development of newspaper building architecture. Concentrating on the main newspaper buildings in the major metropolitan areas in Australia (Melbourne, Sydney, Adelaide) and the UK (Manchester, London, Edinburgh and Liverpool) from 1855 to 2010, Newspaper Building Design interweaves a rich analysis of spatial characteristics of newspaper offices with compelling anecdotes from journalists' working lives, to examine the history, evolution and precarious future of the physical newsroom and the surrounding interior and exterior space. The book argues that newspaper buildings are designed to accommodate and extend journalism's professional values and belief systems over time and that their architecture reflects ideological change and continuity in these

value and belief systems, such as the evolution from trade to profession. Ancillary factors, such as the influence of the newspapers' owners on the building design and the financing of new structures are also considered. As professional practice rapidly shifts out of the newspaper offices, this insightful study questions what this may mean for the future of the industry. Newspaper Building Design will benefit academics and researchers in the areas of media, journalism, cultural studies and urban history.
